PROFESSIONAL SUMMARY

B.E. Information Technology graduate and aspiring AWS & DevOps Engineer with internship training and hands-on project experience in AWS, Linux, Terraform, Jenkins, Git, Docker, and Kubernetes. Practical exposure to cloud infrastructure, Infrastructure as Code, CI/CD automation, and containerization gained through guided training and personal projects. Familiar with core AWS services including VPC, EC2, S3, RDS, IAM, and Application Load Balancer. Seeking an entry-level Cloud or DevOps role.

TECHNICAL SKILLS

- Cloud Platforms: AWS (EC2, S3, RDS, VPC, IAM, ALB)
- Operating Systems: Linux (Ubuntu, Amazon Linux)
- Infrastructure as Code: Terraform, Ansible
- CI/CD & Version Control: Git, GitHub, Jenkins, CI/CD Pipelines
- Containerization & Orchestration: Docker, Kubernetes
- Monitoring & Observability: Prometheus, Grafana, SonarQube
- Build & Artifact Management: Maven, Nexus
- Programming Languages: Python, C

PROJECTS

VPC Network Automated Using Terraform and Jenkins Pipeline

Sep 2026 | Tools: AWS, Terraform, Jenkins, Git, S3, CI/CD | [GitHub Repository](#)

- Automated AWS VPC provisioning and teardown using Terraform integrated with a Jenkins Declarative Pipeline.
- Configured a Jenkins master-agent architecture on EC2 to execute Terraform workflows through a dedicated agent.
- Provisioned VPC networking resources including public/private subnets, Internet Gateway, NAT Gateway, and route tables using Infrastructure as Code.
- Implemented Amazon S3 remote state storage with versioning, Git integration, and parameterized Jenkins builds for Terraform plan, apply, and destroy.

AWS Three-Tier Web Architecture

Aug 2026 | Tools: AWS (VPC, EC2, ALB, ASG, S3, RDS, IAM, Route 53, CloudFront, CloudWatch), Linux | [GitHub Repository](#)

- Built a highly available, fault-tolerant three-tier architecture with separate Web, Application, and Database tiers across two Availability Zones.
- Configured VPC networking with public and private subnets, Internet Gateway, NAT Gateways, route tables, and security groups for controlled tier-to-tier communication.
- Deployed EC2 instances with Auto Scaling Groups, external and internal Application Load Balancers, and RDS MySQL in a Multi-AZ configuration.
- Implemented IAM roles with Systems Manager Session Manager, S3, Route 53, CloudFront, CloudWatch, SNS, and CloudTrail for secure access, DNS, monitoring, alerting, and auditing.

PROFESSIONAL EXPERIENCE

AWS & DevOps Intern - Greateway Software Pvt. Ltd., Pune, Maharashtra

Apr 2026 – Present

- Assisted with AWS and Linux tasks in a supervised training environment, following standard setup and troubleshooting procedures.
- Practiced creating and configuring AWS resources including EC2, VPC, S3, IAM, subnets, and basic security configurations.
- Used Git and GitHub for version control and practiced basic Jenkins CI/CD workflows during training exercises.
- Practiced Docker image and container operations and learned basic Kubernetes concepts including Pods, Deployments, and Services.
- Practiced Terraform and Infrastructure as Code concepts including init, plan, apply, and destroy workflows.

CERTIFICATION

- AWS with DevOps Course – Certificate of Completion, Fusion Software Institute - Dec 2025 | [View Certificate](#)

EDUCATION

- B.E. Information Technology, JSPM's Bhivarabai Sawant Institute of Technology & Research, Pune, Maharashtra
CGPA: 8.44/10 - Jul 2026

EXTRACURRICULAR ACTIVITIES

- Smart India Hackathon (Team Project): Contributed to a team project on a sustainable plastic waste recycling solution - collaborated on problem analysis, solution discussion, and project presentation.
